Command Center

Smart RV Tablet & Hub

QUICK START GUIDE

The **Command Center tablet and hub** is the epicenter of what we're doing here at RVi. It has unlimited product expandability, allowing you to add any new "Official Command Center" or "Works with Command Center" product at the swipe of a finger on the tablet. Communication happens over a proprietary Wi-Fi link, providing a simple yet robust product experience. Let's dive in!

INSIDE THE BOX

Command Center Tablet		Command Center Hub	
Tablet Magnet Dash Mount		Hub Magnet Wall Mount	
3 ft. Micro USB Cable (x2)		Dual USB AC/DC Charger (x2)	

OPERATION

Command Center tablet and hub come paired to each other from the factory. Both have a built-in rechargeable battery, which must be charged depending on usage.

Tablet

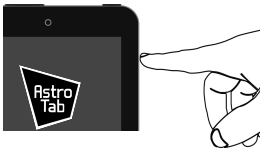

Control at the touch of a finger. It all starts with the Command Center tablet. The Command Center tablet puts you in control of any "Official Command Center" product as well as the built-in RV Level and Checklist.

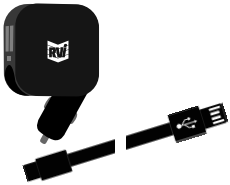

*Learn more about **RV Level** and **Checklist** in Dashboard section pages 7-8.*

To **power** the tablet, press and hold the single power button for 3 seconds.

Charging the tablet with the provided USB cable and Dual AC/DC charger may be necessary, if the battery is low or dead.

Once the tablet has powered on, you will be taken to the **Dashboard**.

Protective Film

A thin film has been applied to the touchscreen to protect it during shipping. To remove it, simply take a corner of the film and peel it away from the screen.

TABLET: Magnet Dash Mount

The Dash Mount for the tablet can be mounted to glass or plastic. Before mounting, clean surface of dust and debris.

1. Peel protective cover from 3M gel suction cup and press firmly in your preferred location.
2. Snap down the suction lock lever.
3. Adjust the magnet surface in the direction of choice and tighten the threaded knob securely.

If 3M gel suction cup loses its stickiness, rinse with warm water and let air dry.

***NOTE:** Textured surfaces are not recommended for mounting.*

Now the mount will hold the Command Center tablet in sight with its powerful magnet.

Hub

Command Center hub is two products in one. First and foremost, it is a translator for all "Official Command Center" products, allowing them to communicate with the tablet through its own privately encrypted Wi-Fi link. Second, it acts as a leveling device for your RV *(see pg. 7)*. Command Center hub must be powered/charging to operate.

***NOTE**: The RVi Wi-Fi link is not an internet source.*

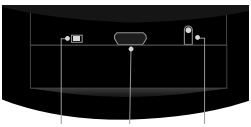

To **power** the hub, press the power button. If the blue Wi-Fi **LED** does not illuminate, then the battery needs to be charged. Use the provided USB cable and Dual USB AC/DC charger. There is an internal battery. It is recommended to leave the hub plugged in at all times. To power off, press and hold the power button for 3 secs. *(Fully charged battery can last up to 12 hours.)*

The hub has two **LEDs**, a power **LED** and a blue blinking Wi-Fi **LED**.

The power **LED** has 4 states.

- **NO LED**: Not charging
- **SOLID RED**: Not charging and battery below 25%.
- **BLINKING GREEN**: Battery charging
- **SOLID GREEN**: Fully charged battery.

LEDs USB POWER

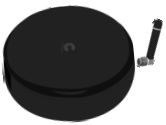

Once the blue Wi-Fi **LED** is blinking on the hub and the RVi app is running on the tablet, it will connect to the tablet. Now you are ready to dive into the **tablet apps**.

HUB: Antenna

The hub comes with an external antenna for powerful communication with RVi products, like Tire Patrol, that communicate on 915mhz. Thread on the antenna pointing the antenna up 90˚ towards the face of the hub.

***NOTE:** Though not required, the most optimized position for the antenna is to point straight up in the air.*

Horizontal

Vertical

HUB: Magnet Wall Mount

The Wall Mount for the hub can be mounted to wood or plastic. Mount as close to the center of the RV near a 12V, 110V for powering the Command Center hub. For Class A motorhomes, it is recommended to mount toward the rear of the coach on a side external wall inside the RV.

Before mounting, clean surface of dust and debris. Peel paper cling from the back of the Wall Mount and press firmly to surface for best attachment.

***NOTE:** Textured surfaces are not recommended for mounting.*

Now the mount will hold the Command Center hub with its powerful magnet.

Tablet Dashboard

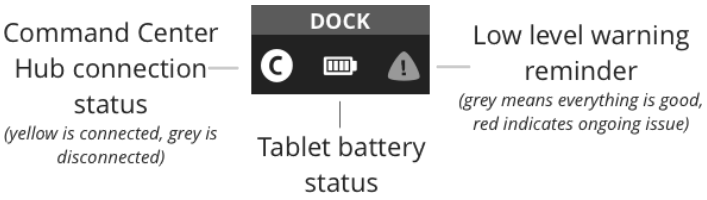

When you first boot up the Command Center tablet you will see the Dashboard. The Dashboard comes loaded with a variety of Command Center apps with the ability to display "Official Command Center" products as they are added.

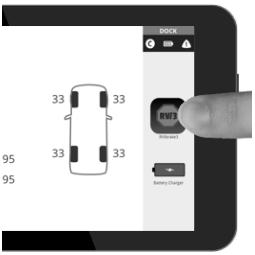

Exactly as it sounds, Drive Mode app is designed for monitoring, controlling and operating the products that you have as you're traveling down the road (ie. RVibrake3 and Tire Patrol). Drive Mode products need to be enabled in the Settings App before they will appear in Drive Mode.

To learn how to enable products, see Settings:Products on page 9.

In the Drive Mode screen, the **Dock** gives quick access to information and other Drive Mode products beyond the product you are currently monitoring.

If you are monitoring more than one product in Drive Mode, you can select the different product icons in the Dock to view them.

RV Level

The RV Level app works with Command Center hub to allow you to level your RV in conjunction with your RV's leveling system. Command Center hub is calibrated at the factory. To level the RV:

1) Unplug the USB cable from the hub and place it on a flat surface of the floor in the middle of the RV.

2) Point the triangle "F" towards the front of the RV.

3) The RV Level App will give instructions on which side of the RV needs to be raised until the RV is level on all four sides.

If the jacks are fully extended, but the RV still isn't level, start over by retracting all jacks and repeat the leveling process.

Travel Checklist

All RVers know that there is a checklist of 100 things to do before hitting the road. The Checklist app puts all this in one place and allows you to make edits, or add anything to the list. No more laminating a piece of paper only to make a change and have to do it again. The Checklist comes with 3 Categories: "Getting Ready For Take Off", "Setting Up Camp", and "Breaking Down Camp".

To add a to-do to a category, simply select "**+ NEW**". You will be given a choice of Single or Multi step to-do. To edit a name or remove an item from the list, select "**Edit**". Selecting the "pencil" icon will allow you to edit a title, while selecting the red "**x**" will delete the item.

It is a powerful thing to check an item off the list! After you have checked everything off your list, select the "**Uncheck Boxes**" button before your next trip to wipe the slate clean for next time. You're going to love the Checklist app.

Support

The Support app is your personal 24/7 support agent. This is where you'll find general info, FAQs, troubleshooting, and contact info. Got a question about how a product works or how to troubleshoot an issue? The Support app is there for you. After you have searched our app, if you don't find an answer to a question you have, never hesitate to call us at 800-815-2159 Mon-Fri 8a-4:30p MST.

Settings

The Settings app is a multi-layered app. Here, you can add "Official Command Center" products, download product updates, edit the settings of the tablet, and much more.

Products: Newly purchased "Official Command Center" products are enabled here. Until a product is enabled, it will not show on the tablet Dashboard.

Command Center: Check to see if Command Center hub is paired and connected, and how much battery life it has left. The RV Level can also be calibrated here.

***Note**: Calibration should not be done unless instructed by Customer Support.*

Tutorials: Each product and its associated app has a tutorial, and each one can be viewed here.

Display: Set the level of desired screen brightness. At night you can turn the brightness down and bring it up during the day.

Profile: Here is where you register your tablet for warranty.

Software Update: Any updates to the tablet can be done here. The tablet will walk you through connecting to the internet and updating. When updates for the tablet are released, RVi will send notification e-mails letting users know.

***Note:** When the tablet asks you to connect to a Wi-Fi network to check for updates, only use networks where a password is required for security reasons.*

The Add Device app is your Dashboard shortcut to pairing a new "Official Command Center" product.

COMPLIANCE

Antenna Usage

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. FCC radiation Exposure Statement to comply with FCC RV exposure requirements in section 1.1307, a minimum separation distance of 0.81 cm (0.3 inches) is required between the antenna and all persons. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

FCC ID:Z64-CC3100MODR1 FCC ID: RVi-CC3PO

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiver antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

The Installer of this radio equipment must ensure that the antenna is located or pointes such that it does not emit RV field in excess of Health Canada limits for the general population; consult Safety Code 6, obtainable from Health Canada's website http://www.hc-sc.gc.ca/rpb

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement

IMPORTANT: Changes or modifications not expressly approved by Danko Manufacturing LLC could void the user's authority to operate the equipment.

WARRANTY

Limited Warranty

How long is the warranty?

Command Center tablet and hub have a one year limited warranty from the original purchase date.

What is covered?

It warrants your product to be free of mechanical and electrical defects in material and workmanship.

Where or how do I get assistance for my RVi product?

During the warranty period, RVi will repair or replace the product (at RVi's discretion), which will be your exclusive solution under this warranty.

Do NOT return the product, doing so may delay the processing of your claim and the repair or replacement of the product. For return instructions, please call RVi Customer Service.

What is not covered?

The warranty will not cover damage resulting from neglect or misuse of the product, use contrary to operating instructions, or disassembly, repair, or alteration by any person other than RVi's repair department. RVi is not liable for any incidental or consequential damages for breach of any expressed or implied warranty on the product.

How state laws may apply

Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitation may NOT apply. This warranty gives specific legal rights, and you may also have other rights, which vary from state to state.

"This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation."
